

# Hacker's Ethic

Bahria Tech Talks - 12 Jan 2019

Access to computers - and anything which might teach you something about the way the world really works - should be unlimited and total. Always yield to the Hands-On Imperative!

All information should be free.

Mistrust authority - promote  
decentralization.

Hackers should be judged by their skills,  
not bogus criteria such as degrees, age,  
race, or position.

You can create art and beauty on a  
computer.

Computers can change your life for the  
better.
